

PRESSURE TESTING SERVICES

SGS MIS TESTING OFFER A WIDE RANGE OF PRESSURE TESTING SERVICES

SGS MIS Testing offers an extensive range of both Fluid and Gas pressure testing services including, but not limited to, the following:

- Proof pressure testing
- Burst pressure testing
- Cyclic pressure testing
- External pressure testing
- Elevated temperature pressure testing
- Sub-zero temperature pressure testing

HYDRAULIC PRESSURE TESTING

We are able to test to in excess of 3,000 bar using water or mineral oil.

GAS PRESSURE TESTING

Up to 1,800 bar using Nitrogen, Helium or Argon.

RECORDING AND REPORTING

All our customers, along with independent third party witnesses, are welcome to visit our facilities and witness all aspects of our work.

Static photography and video recordings are available for all work carried out by SGS MIS Testing.

All work is monitored and recorded using digital pressure, temperature and flow transducers enabling detailed post-test analysis to be carried out.

ADDITIONAL SERVICES

SGS MIS Testing offers the following additional services to assist with your testing requirements.

- Manufacture and machining of all auxiliary equipment needed to test your components
- Welding and fabrication of test frames and equipment
- Bespoke test system design
- Electrical control systems to monitor cyclic testing, stress/strain evaluation, load and force monitoring

QUALITY ASSURANCE

As part of the world's leading inspection, verification, testing and certification company, SGS MIS Testing Ltd. always ensures quality assurance is at the forefront of our business.

WHY SGS

SGS is the world's leading inspection, verification, testing and certification company. SGS is recognised as the global benchmark for quality and integrity.

Enhancing processes, systems and skills is fundamental to your ongoing success and sustained growth. We enable you to continuously improve, transforming your services and value chain by increasing performance, managing risks, better meeting stakeholder requirements and managing sustainability.

With a global presence, we have a history of successfully executing large-scale, complex international projects. Our people speak the language and understand the culture of the local market and operate in a consistent, reliable and effective manner.
