# ABSTRACT

The purpose of this document is to provide an introduction to the ISO 22716:2007 standard on Good Manufacturing Practices (GMP) for cosmetic products. It aims to promote the understanding of GMP across the entire cosmetics product supply chain as well as to discuss the legislative precursors to the

development of the Standard. In addition, it provides a resource for those organisations interested in implementing the specific requirements of the standard in order to support their business at a domestic or international level within the cosmetics industry.
