

**PICK THE ENVIRONMENTAL
RISKS AND OPPORTUNITIES
THAT YOU WANT TO
PUT ON YOUR PLATE**

YOU FEEL YOU SHOULD DO SOMETHING ABOUT THE ENVIRONMENT, BUT YOU'RE NOT QUITE PREPARED FOR ISO 14001?

WHY DON'T YOU TRY THE PHASED AND PROBLEM-SOLVING ORIENTATED APPROACH OF ISO 14005?

This International Standard uses a phased approach to implement an environmental management system. This can grow to meet the requirements of the International Standard for environmental management systems, ISO 14001, if you so wish. A phased approach offers several advantages – for example, users can implement their system step by step, adding or expanding elements as they provide value to the organisation.

HOW DOES IT WORK?

HOW CAN WE HELP?

AUDIT & ASSESSMENT

We help you identify where the biggest opportunities and risks lie. We screen all opportunities and risks related to your organisation, whether it's related to cost saving, entering new markets, achieving legal compliance, or improving your image and relationship with the local community.

TRAINING AND TECHNICAL DEVELOPMENT

We support you with building internal technical capabilities through the delivery of workshops aimed at those different environmental opportunities and risks you have chosen to address.

For every chosen environmental area, we will go through the different related management stages: characterisation, legal requirements, training and awareness, operational control and monitoring.

You can choose to attend workshops on several themes at once, or in a sequential order according to your resources and management priorities.

MANAGEMENT AND TEAM COACHING

Coaching includes: assisting individuals in identifying goals, communicating effectively with their peers, staff and external stakeholders; prioritising tasks and managing projects; and embedding environmental management across all organisational activities.

CORPORATE EVENTS

Including: designing bespoke programmes contextualised to specific services or themes, delivering large-scale presentations and training seminars, and arranging key speakers to attend transformational practice sessions.

TRAIN THE TRAINER AND IN-HOUSE INDUCTION PROGRAMMES

Including: supporting staff to become internal environmental trainers, and the delivering induction programmes.

ENVIRONMENTAL CHAMPIONS

Including: training and coaching staff to engage with main stakeholders, assisting in the identification of present and foreseen risks and opportunities, and the dynamic enhancement of project teams and results dissemination across the organisation.

WHY SGS?

SGS is the world's leading inspection, verification, testing and certification company. Recognised as the global benchmark for quality and integrity, we employ over 64,000 people and operate a network of more than 1,250 offices and laboratories around the world.

We are constantly looking beyond customers' and society's expectations in order to deliver market-leading services wherever they are needed. Partnering with SGS opens the door to better performing processes, increasingly skilful talent, consistent and compliant supply chains, and more sustainable customer relationships delivering profitable competitive advantage.

Work with the global leader and take your commitment to the next level. We have a history of undertaking and successfully executing large-scale, complex international projects. With a presence in every single region around the globe, our people speak the language and understand the culture of the local market and operate globally in a consistent, reliable and effective manner. In addition, we are the global leader in ISO 14001 certification and the most widely accredited certification body.
