MOVING FROM ESOS TO **ISO 50001**

SGS ACADEMY

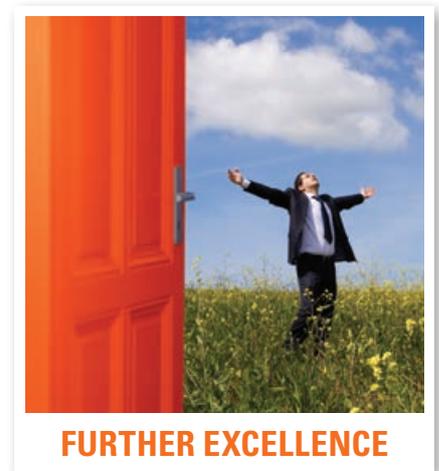

SGS ACADEMY

MOVING FROM ESOS TO ISO 50001

The Energy Savings Opportunity Scheme (ESOS) was created to ensure future energy security, control energy costs increase and to tackle climate change. The scheme includes four different compliance routes. These four routes can be used independently or combined, as long as at least 90% of an organisation's energy consumption is covered by at least one compliance route.

- ESOS energy audits
- Accredited ISO 50001 certified Energy Management System
- Display Energy Certificates (DECs)
- Green Deal Assessment

All routes to compliance will highlight energy saving opportunities, however, moving to ISO 50001 certification is the only route that specifically requires that opportunities for energy performance are not only identified but are implemented; energy performance is monitored and includes a requirement for continual improvement in energy performance. It is this complete approach to energy management that is most likely to lead to sustained energy performance improvement and financial savings.

ISO 50001 is also the only route to compliance that does not require an ESOS assessor involvement.

SGS certification enables you to take a systematic approach to continual improvement of energy performance and shows your commitment to effective energy management systems. ISO standards are recognised worldwide as best practice, they go beyond minimum legal compliance requirements and accredited certification is the energy management top branding.

ISO 50001 is easily integrated with existing management systems standards, in particular with the Environmental Management Systems standard (ISO 14001) and Quality Management Systems standard (ISO 9001). Like other management systems, once implemented into the business practices it is a simple matter of ongoing maintenance, which is facilitated through annual SGS surveillance audits. This not only provides the energy performance improvements discussed above but gives organisations the peace of mind they have no additional work required of them to meet future compliance phases.

MOVING FROM ESOS TO ISO 50001

REF: EnMOV

DURATION: 1/2 DAY

AIMS

The aim of this course is to provide participants with an understanding of the benefits of an ISO 50001 energy management system in comparison to ESOS audits and how to implement one.

By the end of this course, participants will:

- Understand the differences between ESOS energy audits and energy management systems
- Know how to use the data, information and opportunities for improvement from an ESOS audit to build an energy management system
- Identify elements of existing management systems that support ISO 50001 implementation, e.g. ISO 14001 and ISO 9001
- Plan the implementation of an energy management system

Delegates will receive a complimentary Energy Health Check tool to enable their organisation to develop energy management systems.

PROFILE

Participants who complete this training will understand how to integrate energy consumption and energy efficiencies gleaned from ESOS audits into an ISO 50001 energy management system, ensuring energy saving opportunities are continually planned, implemented and checked to drive efficiencies through continual improvement.

AUDIENCE

It is desired that participants of this course have undertaken ESOS audits and are interested in implementing ISO 50001 energy management systems.

COURSE DATES

25 May – Heathrow

23 June – Manchester

14 September – Heathrow

1/2 DAY – £350+VAT

£250+VAT (Current ESOS assessment customers)

ON-SITE BESPOKE TRAINING

The SGS Academy offers a range of training in-house. We also have the knowledge and expertise to design a custom-made course to fulfil your specific requirements.

Contact us for a no-obligation quote.

ENERGY MANAGEMENT SYSTEMS

ENMSFTC	ISO 50001 INTRODUCTION AND AWARENESS	1 DAY – £350
	This energy management systems (EnMS) foundation course will provide you with the understanding of what EnMS is, the main requirements of ISO 50001 and how to improve the system where it is established. Once completed, you will be able to register for an EnMS internal or lead auditor course.	01 JUNE 05 OCTOBER BIRMINGHAM CAMBERLEY
		 
IENMSA	INTERNAL ENERGY MANAGEMENT SYSTEMS AUDITOR	2 DAYS – £695
	This course aims to equip participants with the knowledge and skills needed to assess and report on the conformance and effective implementation of an energy management system against ISO 50001.	02 JUNE 06 OCTOBER BIRMINGHAM CAMBERLEY
		 
ENMSLAC	ISO 50001 LEAD AUDITOR COURSE	5 DAYS – £1215
	 IRCA certified course: A17574 Designed for anyone who wants to gain the knowledge and skills necessary to audit energy management systems against ISO 50001 using the auditing techniques described in ISO 19011. Once successfully completed, you will have met the training requirements to apply for registration as an IRCA EnMS auditor or lead auditor, and be able to join a conversion course to transfer your skills to another management programme.	01 AUGUST 07 NOVEMBER NR HEATHROW NR HEATHROW
		 
ENMSACC	ENERGY MANAGEMENT SYSTEM AUDITOR CONVERSION COURSE	3 DAYS – PLEASE CALL US FOR A NO-OBLIGATION QUOTE
	This course aims to equip experienced lead auditors with the knowledge needed to assess and report on the conformance and effective implementation of an energy management system, against ISO 50001.	

ENHANCED PERFORMANCE

ENERGY MANAGEMENT SYSTEMS – ON-SITE TRAINING

The SGS Academy offers a range of training available in-house. These courses include refresher training, EnMS implementation training and all those listed above.

BESPOKE TRAINING

The SGS Academy has the knowledge and expertise to design a custom-made course to fulfil your specific requirements for ISO 50001 training. Contact us today for a no-obligation quote.

ENERGY MANAGEMENT SYSTEMS

SGS ACADEMY *In partnership with*

The SGS Academy in partnership with the Energy Institute is pleased to be able to offer our clients professional training and qualifications in energy management.

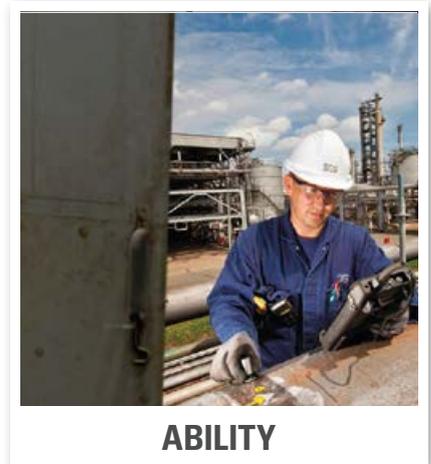

WHY TRAIN WITH THE ENERGY INSTITUTE?

Effective energy management is an essential tool in helping to reduce carbon emissions, improve efficiency and save money.

As the professional body for the energy industry and the only body granting the Chartered Energy Manager title, the Energy Institute (EI) is committed to providing professionals with all the resources they need to achieve the highest level of competence in energy management.

Completing EI training and achieving qualifications allows professionals to develop their knowledge and skills and demonstrate their experience to employers, clients and peers, resulting in improved employability, confidence and performance.

Those undertaking EI training benefit from a host of additional professional development resources at their disposal, from networking opportunities and events to free online CPD articles and knowledge resources.

ABILITY

ENERGY INSTITUTE TRAINING LEVELS

ENERGY INSTITUTE LEVEL 1

CERTIFICATE IN ENERGY MANAGEMENT ESSENTIALS

A 5-day practical introduction to energy management, recommended for those new to an energy management role or those taking on energy management responsibilities in an existing role for the first time. Available in classroom or online format.

ENERGY INSTITUTE LEVEL 2

ENERGY MANAGEMENT PROFESSIONAL

A 150-hour online course providing all the knowledge and skills required of a professional energy manager. Recommended for those with 2+ years' experience in a related role.

ENERGY INSTITUTE LEVEL 3

ADVANCED ENERGY MANAGER (AEM)

A 12-day classroom course for experienced energy managers covering project management and key technologies. Recommended for those with 3+ years' experience in an energy management role.
