

# Valve and Engineering services

Whether used as a protective safety device, for control purposes, or isolation within a process system the correct, accurate and reliable operation of your valve is fundamental to a confident and compliant operation.

## Refurbishment, Testing and Overhaul

Assurance of an assets functionality, performance and compliance is an essential part of any compliant Quality Management, or asset integrity System. SGS United Kingdom Ltd's Valve Services ensure traceable refurbishment, overhaul and testing of our clients assets providing a cost effective and reliable service to our customers.

Covering a wide range of valve types and manufacturers including pressure relief, control, isolation, and regulating types our services can be delivered either upon customer's premises using solutions including containerized workshops (onshore and offshore), mobile test vans or via one of our network of custom equipped valve facilities. Regardless of location the same high standards of quality and traceability remain to national standards utilizing our fully skilled engineering workforce.

SGS's ongoing investment in technology sees an ever growing network of innovative solutions capable of satisfying the most exacting of standards including our bespoke web based reporting interface and SGS's site based valve assessment systems (VTIL) which supports our clients needs for interim assessment of relief and safety valves without the need for removal.

Our ASME assessed experienced personnel will deliver the highest level of service, allowing you to take control of your operation and be rest assured of compliance.

SGS has the relevant capabilities and experience to offer a full work package management service. For instance we can take ownership of the valve overhaul and testing element of a site outage, shutdown, project or changeover and offer varying levels of management capability including supporting services such as machining , lapping, flange refurbishment and spares sourcing and supply.

SGS is proud to be the UK's approved service provided for HORA and Persta valves.

We are SGS – the world's leading testing, inspection and certification company. We are recognized as the global benchmark for quality and integrity. Our 93,000 employees operate a network of 2,600 offices and laboratories, working together to enable a better, safer and more interconnected world.
