

ISO 22716 – **GOOD MANUFACTURING PRACTICES (GMP)** FOR THE COSMETIC INDUSTRY

COURSE PROFILE

This awareness training course provides an overview of the specifics of Good Manufacturing Practices for Cosmetics (GMP) following ISO 22716:2007 guidance. This is particularly relevant for organisations that produce cosmetic products and need to become compliant to GMP. It will inform about the special requirements involved to build a quality management system (QMS) according to the GMP principles and following the ISO 22716 articles. Several practical cases will be highlighted during the course. The certification programme for a compliant ISO 22716 cosmetic products GMP organisation will be described.

COURSE OBJECTIVES

Upon completion of this course, learners will be able to:

- Explain the purpose and business benefits of GMP
- Outline the structure and content of ISO 22716
- Have a general understanding of GMP as applied for cosmetic product procedures

AUDIENCE

This course is an introduction for anyone involved in the development, implementation and management of Good Manufacturing Practices (GMP) for cosmetic products. Participants are not expected to possess knowledge of GMP practices or ISO 22716:2007 before attending the course.
