The business of oil and gas faces an unprecedented increase in the removal and recycling of platforms worldwide. As a global leader in providing services to the oil and gas industry, SGS provides you with a range of technical, analytical and consultancy services to successfully overcome the challenges, demands and non-negotiable goals associated with decommissioning. We have a proven track record of delivering innovative, independent and competitive services. Our solutions reduce risk and reduce cost, while at the same time increasing safety, reliability and quality in your processes. Our growing global/local network includes a diverse range of specialist teams that offer the regulatory understanding and technical expertise you need to deliver decommissioning in the most cost effective manner while meeting stakeholder needs for independent assurance. Trust in SGS and partner with the world's leading inspection, testing, verification and certification company for your next decommissioning project.

SGS DECOMMISSIONING SERVICES

Laboratory Services

SGS has experience of providing analytical support for major decommissioning projects in the North Sea including method development, sample management and specialised analysis on a range of sample types. We provide a range of best-in-class fixed laboratory services and onsite analytical services that feature the most advanced equipment and technology available.

Asset Integrity Management Services

We maintain your assets to ensure productivity, reliability and safety from a tailored programme that helps you reduce risks and meet all relevant regulations.

Non Destructive Testing (NDT)

Our worldwide reputation and proven track record gives you complete peace of mind from knowing your decommissioning NDT is carried out by qualified and certified inspectors in accordance with international standards.

Wireline and Slickline Services

Our slickline units are tried and tested, providing you with a variety of well intervention services and measurements that are essential during decommissioning.

Environmental Services

Minimise your environmental impact through our world-leading and comprehensive range of specialist solutions that help you monitor, manage and prove your environmental credentials.

Remediation Study

Protect against environmental impact and increase the value of your site via a remediation study by our accredited environmental teams that analyse the presence of pollutants and inform on the most cost-effective solutions.

SGS ADDS UP

SGS is the world's leading inspection, verification, testing and certification company. Recognised as the global benchmark for quality and integrity, we employ over 85 000 people and operate a network of more than 1 800 offices and laboratories around the world. We are constantly looking beyond customers' and society's expectations in order to deliver market leading services wherever they are needed.

We have a history of undertaking and successfully executing large-scale, complex international projects. With a presence in every single region around the globe, our people speak the language and understand the culture of the local market and operate globally in a consistent, reliable and effective manner.

We provide innovative services and solutions for every part of the oil, gas and chemicals industry. Our global network of offices and laboratories, alongside our dedicated team, allows us to respond to your needs, when and where they occur. Our reputation for independence, excellence and innovation has established us as the market leader in providing services that improve efficiency, reduce risk and deliver competitive advantage for you.
