eGTA is a leading enterprise solution for international trade. Cloud based or On-Premises software that interfaces seamlessly with your business systems to generate commercial trade documents and manage your customs declarations.

Developed and supported by SGS United Kingdom Ltd, a UK based software developer specializing in international trade. SGS endeavours to build the best software, provides uncompromising support and leads in technology for international trade.

*"We have found eGTA to be a vital tool for creating our export documentation. We spend much less time completing documentation than we did with our previous system."*
