

TransitNet: Customs Transit Made Easy

**POST-BREXIT, UK COMPANIES WISHING TO TRANSPORT THEIR GOODS
TO AND FROM MAINLAND EUROPE WILL NEED A TRANSIT CUSTOMS DECLARATION.**

In order for a company to submit a Transit Declaration, they need a comprehensive customs guarantee along with customs adapted software. Both can be difficult and expensive to obtain. SGS United Kingdom Ltd introduces TransitNet- a unique package that offers UK companies a multinational e-customs transit service that negates the need to have your own guarantee or software.

TransitNet is a multinational, multimodal e-customs service for transit where SGS acts as the Holder of the Procedure (HoP) for customs liabilities and extend the use of their guarantee and software to their clients (shippers, brokers, freight forwarders, etc.).

SGS TransitNet is a user-friendly web based application which allows users to submit Transit Declarations to 24 National Computerized Transit System (NCTS) countries, Moldova and Belarus. Users also have the ability to control and monitor their Transit Declarations with real-time updates from local customs and NCTS systems all through one single window.

TRANSIT & EXPORT

Through our UK based TransitNet client centre, users can request Transit documents as well as Export declarations offering a one-stop shop for export, however it is the responsibility of the client to arrange for import clearance and closure of the transit, failure to close a transit can result in penalties from the receiving customs administration. Using a Transit Declaration alongside an export declaration will move customs checks away from the port to an inland customs office or an authorised consignee's premises and help to avoid long delays at the borders.

24/7 SUPPORT

Clients of TransitNet can avail of 24/7 support for all matters connected to their Transit Declarations created in the system. Through our affiliates and our team of over 200 customs experts, SGS TransitNet can offer technical support as well as support in dealing with problems at local customs.

CUSTOMS GUARANTEES

TransitNet clients do not need to own their own customs guarantees; which can be extremely expensive to maintain. All transit declarations created via TransitNet are submitted using SGS's own customs guarantees in accordance with Customs Territory Regulation. This removes any additional financial burden on companies who use our service.

Also, did you know that the guarantee needed for each shipment can be up to and in excess of 28% of the total value of the goods being transported?

MULTINATIONAL SGS

TransitNet not only enables you to perform Transit and Export Declarations from the UK. Clients can also submit Transit Declarations from 23 other NCTS countries which covers return journeys back to the UK. TransitNet also allows users to submit complete customs documents for trucks travelling from the UK to destinations including Belarus, Russia, Kazakhstan, Kyrgyzstan and Moldova.

EASE OF USE

No prior knowledge in the area of customs is needed with TransitNet. We make the entire process simple for you. TransitNet is faster and cheaper than other road transit services where users simply pay per transaction. All clients can monitor the status of their transit movements with real-time updates.
