

PACKAGING SOLUTIONS & SERVICES

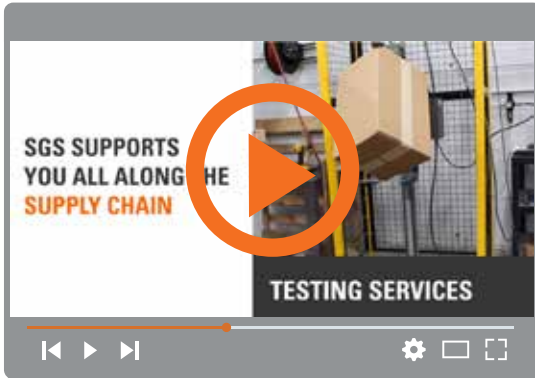

PROTECT PRODUCT, THE
ENVIRONMENT & YOUR BRAND

WHEN YOU NEED TO BE SURE

SGS

SGS ENSURES YOUR PACKAGING IS FIT FOR EVERYDAY USE

Quality and performance testing for packing has never been more important. The UK packaging industry faces pressure from commercial drivers, legislative changes and the desire to improve products while also reducing waste. At our flagship facility in Bradford, we can arrange for testing of all types of outer carton, shipper and retail packaging including ISTA testing, Amazon Certification and chemical testing against the Packaging Waste Directive.

We can help manage all your key requirements as well as provide peace of mind that the products can get from A to B in one piece, including:

- Physical and mechanical properties testing
- Weathering and accelerated ageing testing
- Chemical properties testing
- End-of-life characteristics evaluation and testing

In the UK, and beyond, our global network of experts and laboratories are recognized by accreditation bodies and authorities including UKAS, COFRAC, CNAS, TAF, IAS and ISTA (6-Amazon, FEDEX & Sam's Club Transit Testing).
