

MATERIALS **TESTING** AND TECHNICAL SERVICES TO **INDUSTRY** AND COMMERCE

A FULL RANGE OF TESTING SERVICES FROM SGS MIS TESTING LTD

SGS MIS TESTING LTD IS **THE ANSWER** TO YOUR TESTING NEEDS

MIS Testing was established in 1983, to deliver a range of technical services to industry and commerce. The service ethic that formed the basis of the company's reputation in the early years remains as strong as ever and will continue to underpin the business moving forward.

In September 2013 MIS became part of the renowned SGS Group, adding new services to SGS in the United Kingdom and in return benefitting from the excellent reputation and systems of SGS.

ABOUT US

SGS MIS Testing Ltd is a major force in the UK testing market and provides state-of-the-art testing services and facilities, with over 30 years' experience in metallurgy, mechanical testing, chemistry, pressure testing, coatings, fracture mechanics, corrosion testing and other areas of material testing.

Whatever, your testing needs, SGS MIS Testing Ltd can help.

ROUTINE TESTING

SGS MIS Testing Ltd offers a wide range of routine mechanical and metallurgical testing services carried out in compliance with all internationally recognised standards:

- Tensile testing from sub-zero to 900°C
- Charpy impact testing from room temperature to -196°C
- Hardness testing, Brinell, Vickers and Rockwell
- Metallography (macro and micro examinations)
- Weld procedure and welder qualification testing

SPECIALIST TESTING

From fracture mechanics to drop weight tear testing, from pressure testing to bespoke load testing, SGS MIS Testing Ltd can offer an unrivalled range of bespoke testing services.

CORROSION TESTING

The performance of materials in corrosive environments is a critical aspect in their selection; SGS MIS Testing Ltd can assist in this by carrying out standard corrosion tests that investigate susceptibility to pitting and to intercrystalline corrosion.

COATINGS TESTING

Coating systems add value to engineering products such as pipelines, bridges, steel structures and components by extending life and promoting integrity. SGS MIS Testing Ltd can assist in the selection of appropriate coating systems, in assessing the soundness of applications and in evaluating the physical, chemical and environmental performance of the systems.

SITE SERVICES

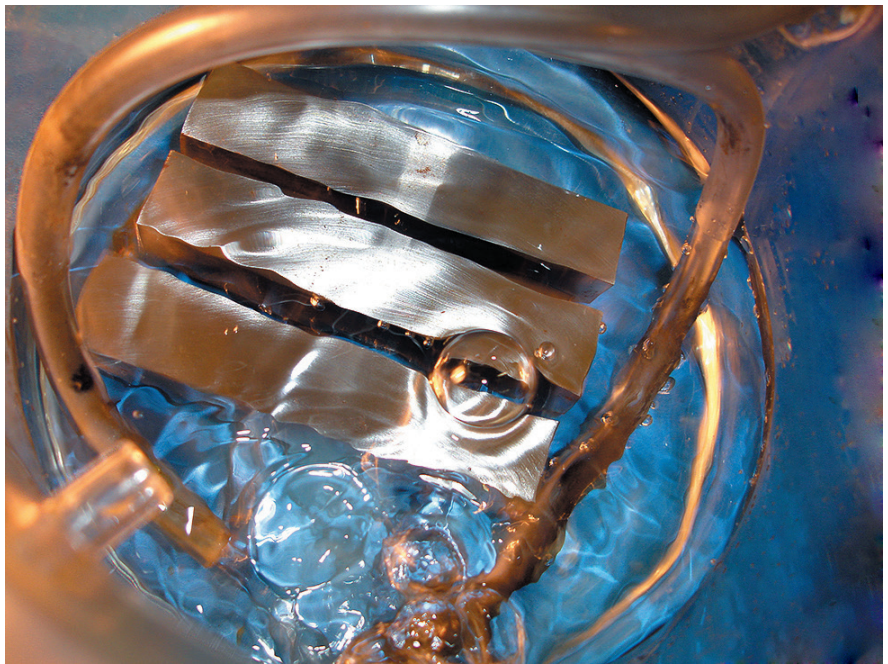

Often components or structures that require testing cannot be moved to the laboratory, but we can bring the laboratory to the site. SGS MIS Testing Ltd offers a comprehensive site testing service and our teams can be despatched quickly around the globe.

Our testing services Include:

- Metallurgical replication and material sampling
- Positive material identification (PMI)
- Portable hardness and in-situ ferrite testing
- Coating/corrosion inspection

FORENSIC FAILURE INVESTIGATIONS

When engineering components fail in service, a full investigation is often an urgent prerequisite in an attempt to establish the exact cause as well as helping to prevent it from happening again.

WELDING INVIGILATION AND CERTIFICATIONS

Compliance with welding quality standards and the provision of competent welding engineering personnel is becoming an increasing requirement of engineering projects. Certain projects may require a named authorised Welding Co-ordinator or a European Welding Engineer. We can provide a Chartered Welding Engineer qualified to European Welding Engineer and International Welding Engineer status.

SGS MIS Testing Ltd, provides wide-ranging welding engineering services including consulting, feasibility studies, welder training, weld procedure and welder qualification services.

WHY SGS MIS TESTING LTD

SGS is the world's leading inspection, verification, testing and certification company. Recognised as the global benchmark for quality and integrity, we employ over 80,000 people and operate a network of more than 1,650 offices and laboratories around the world.

Enhancing processes, systems and skills is fundamental to your ongoing success and sustained growth. We enable you to continuously improve, transforming your services and value chain by increasing performance, managing risks, better meeting stakeholder requirements and managing sustainability.

With a global presence, we have a history of successfully executing largescale, complex international projects. Our people speak the language and understand the culture of the local market and operate in a consistent, reliable and effective manner.
