HOW CAN YOU DEMONSTRATE ENVIRONMENTAL RESPONSIBILITY?

**ISO 14001 ENVIRONMENTAL MANAGEMENT SYSTEMS AUDITS,
CERTIFICATION & TRAINING SERVICES**

SGS

ISO 14001:2004 Environmental Management Systems (EMS) certification helps you stand out from the competition. It shows existing and potential customers your commitment to complying with environmental standards and supports you in reducing the environmental impact of daily operations.

The standard sets a basis for how to manage the environmental aspects of your business activities more effectively, while taking into consideration environmental protection and pollution prevention. It helps you ensure compliance with environmental legislation and reduces the risk of penalties and possible litigation.

THE BENEFITS

ISO 14001:2004 enhances the reliability of your operations, increases your performance and brings economic benefits. Demonstrating commitment to the environment can transform your organisation's culture, improve employee morale and open new business opportunities with environmentally aware customers. It helps you minimise energy use, reduce operating costs and contribute to continual improvements in your environmental performance.

SGS is the most widely accredited certification body and the global leader in ISO 14001:2004 certification. A valid ISO 14001:2004 certificate shows your organisation follows the most internationally recognised environmental management principles.

HOW THE CERTIFICATION PROCESS WORKS

- Step A - Tailored proposal from SGS.
- Step B – Optional 'pre-audit' of readiness and weaknesses.
- Step C – Formal audit 'Stage 1 – Readiness Review'. On-site audit and review of EMS documents and other key system elements.
- Step D – 'Stage 2': interviews, examination of records and observation of working practices. ISO 14001 certificate issued upon successful outcome.
- Step E – Surveillance visits to check the system and action plan implementation.
- Step F – Re-certification audit after three years.
