MOBILE SAMPLE PREPARATION LABORATORIES

ACCESS TRUSTED, THIRD PARTY LABORATORY SERVICES IN REMOTE LOCATIONS

LEADERSHIP
When it comes to laboratory services at your site, SGS is the unparalleled global leader. We have earned the reputation for applying the same ethical principles, procedures and quality standards in our mobile laboratories that we do in our own on-site and commercial laboratory facilities. Our mobile sample preparation units (MSPU) allow you to access trusted, third party laboratory services in locations that might not otherwise support full laboratory facilities.

EXPERTISE
SGS brings over 30 years of on-site and commercial laboratory experience to the design of mobile laboratories to ensure that they are safe, efficient, well staffed and operationally stable. Allowing SGS to locate, equip, staff and operate a mobile laboratory on your project site, no matter how remote, will ensure that you benefit from our full scope of capabilities. SGS mobile laboratories promote fast turnaround and the timely geochemical or assay data that you need to effectively run and optimize your exploration or mine development project.

FLEXIBILITY
Various models of the SGS MSPU are available depending on the project location/climate, sample size, preparation protocol and required sample throughput. We install state-of-the-art equipment from Rocklabs, Donaldson Company, Mincom and Ingersoll Rand. We have various operational options available, including:

- SGS manages only and you provide the staff.
- SGS manages and provides the staff.
- SGS manages only and you provide the staff.
- SGS manages and provides the staff.

Our mobile laboratories can also help transition exploration projects into production as on-site facilities are being constructed.

BENEFITS OF THE SGS MOBILE LABORATORY
You gain a competitive edge when you take advantage of SGS’s mobile laboratory services. By choosing our mobile laboratory services, you will:

- Gain NI 43-101/JORC defensible data with minimal operational demands on your project team.
- Benefit from fast turnaround and accurate, reliable geochemical and/or assay data.
- Reduce shipping delays.
- Gain flexibility. Our mobile laboratory service allows you to choose the sample preparation protocol that best suits your needs.
- Allocate your financial and staff resources more effectively by focusing on the core aspects of your program.
- Take advantage of SGS’s globally recognized technical expertise and laboratory quality management program.
- Take advantage of SGS’s expertise and experience in real time, even in the remotest location.

When you choose an SGS mobile sample preparation laboratory, you get globally recognized geochemical data at your doorstep. Contact us to see how you can take advantage of our extensive expertise and experience anywhere in the world.
